EDUCATIONAL TOUR TO SULAIBIYA SEWAGE TREATMENT PLANT

The Class XI science stream students of Indian Public School, Salmiya were taken on an educational field trip to Sulaibiya Sewage treatment plant on 11TH and 12th of December. The trip to the plant which has two locations- one at Sulaibiya and another at Ardia- was thoroughly instructive and informative.

The students were shown the control room that has monitors with the layout of different structures involved in the purification process. The students were informed that around 600 million litres of sewage is being produced by Kuwait in a day. Apparently the Sulaibiya plant only receives domestic waste and the pre- treatment of waste takes place at Ardia. Pipes from Ardia go directly to Sulaibiya with the waste water, which is then stored in tanks there for treatment. It is then sent to Aeration tank which is the heart of the process. There 'Activation Sludge' containing micro-organisms are used to treat the sewage.

The students were shown the various procedures and steps involved in the treatment of sewage, which ultimately leaves the plant as clean water. The different tests involved in the Chemical Lab which ensures that the treatment is working efficiently, the Microbiology Lab where the health of the activation sludge is checked etc. made it all an edifying experience for the students as well as the accompanying teachers.

The session was titled, 'Navigating Future'. The resource person guided the parents and students through the various career options available for students in India and abroad. He also briefed them on the competitive examinations which are to be cleared in order to get admission in the high ranking universities around the world. He spoke about the scholarship options available in the reputed colleges across the globe. The students usually wait for their class XII Board examination results to start applying for the colleges, which is apparently not the right way to proceed. Mr Jomy instructed the students to start with their preparations from Class IX onwards. The students could take various aptitude tests in order to choose the right career from the millions of options available. He asked them to look for the skills which are in high demand and proceed accordingly, rather than going for the stereotypical professions. He steered them through the reputed colleges in India which are easily accessible for the students from other nationalities. The programme concluded with a Q & A round which gave the students and parents ample opportunity to clarify their queries. This interactive session was appreciated by all present.
